HEALTH PLAN

Understanding your formulary

What is a formulary?

A formulary is a list of prescribed medications chosen by health care providers on Sanford Health Plan's Pharmacy and Therapeutics Committee. Selection criteria includes clinical efficacy, safety, and cost. Medications on this list are approved by the U.S. Food and Drug Administration for use in the United States.

How do I use my formulary?

You and your provider can consult the formulary to help you select the most cost-effective prescription medications. This guide tells you if a medication is generic or brand, and if special rules apply. If your medication is not listed here, please visit sanfordhealthplan.com, log in to your Member Portal at sanfordhealthplan.com/memberlogin or call the toll-free member phone number on your ID card.

About this formulary

Where differences exist between this formulary and your benefit plan documents, the benefit plan documents rule. This may not be a complete list of medications, and not all medications listed may be covered by your plan. Please look at the benefit plan documents provided by your employer or plan sponsor for full details.

Reading your formulary

The formulary gives you choices so you and your provider can decide your best course of treatment. In this formulary, brand-name medications are shown in UPPERCASE (for example, CLOBEX) and generic medications in lowercase (for example, clobetasol).

Drug Category Information

The drug category determines the cost levels you pay for a medication. This is how much you will pay when you fill a prescription. Using generic or formulary brand medications can help you pay your lowest out-of-pocket cost. Consult your Summary of Benefits and Coverage (SBC) to determine your cost for each of the drug categories listed below.

Drug Category	Includes		Helpful Tips
Generic	\$	Lower-cost generic medications	Use generic drugs for the lowest out-of-pocket costs.
Formulary Brand	\$\$	Mid-range cost preferred brand-name	Use Formulary Brand drugs if a generic alternative is not available.
Non-Formulary Brand	\$\$\$	Higher-cost non-preferred	Non-Formulary Brand drugs are not listed and have lower-cost options in Generic or Formulary Brand categories. Ask your provider if they could work for you.
Medical Benefit		Medical Benefit medications	These are medications dispensed at the pharmacy that are subject to your medical deductible, coinsurance and maximum out of pocket.

Drug list information

In this drug list, some medications are noted with letters next to them to help you see which ones may have coverage requirements or limits. Your benefit plan determines how these medications may be covered for you.

PA

Prior Authorization – You or your provider must get pre-approval for the medicine with Sanford Health Plan before you can get the prescription filled. NOTE: The Member is ultimately responsible for obtaining pre-approval from the Plan, but your provider may also request approval.

QL

Quantity Limit / Amount Allowed – Medication may be limited to a certain quantity.

SP

Specialty Medication – Medication is designated as specialty. Specialty medications are typically used to treat complex medical conditions. These medications may require frequent dosing adjustments, close monitoring, special training, or compliance assistance. In addition, specialty medications may need special handling and/or administration, and may have limited or exclusive product availability and distribution.

ST

Step Therapy – Trial of a lower-cost medication(s) is required before a higher-cost medication can be covered.

MB

Medical Benefit – Medications covered under the medical benefit that are subject to the medical deductible, coinsurance and maximum out of pocket.
