

## Is your medication covered?

Sanford Health Plan has a list (formulary) of FDA-approved, brand name and generic medications that are covered by the plan. Selection criteria for medications on the list include effectiveness, safety and cost-effectiveness. Changes are made throughout the year by Sanford Health Plan's pharmacy and therapeutics committee as necessary, with a complete review performed each year. By following the formulary and using generic medications when available, members can save money and help control out-of-pocket costs. To review your most current formulary document, follow these steps:

- 1 Log in to your MyChart member portal at [sanfordhealthplan.com/memberlogin](https://sanfordhealthplan.com/memberlogin)
- 2 In the top-left side, click on **'Menu'**
- 3 Scroll down to the **'Insurance'** section
- 4 Choose **'Portals and Links'**
- 5 Click on **'Pharmacy Information'**

After clicking on **'Pharmacy Information'**, you will have the ability to learn about Optum Home Delivery, get pricing for a medication and find a pharmacy. The webpage will also populate pricing for a medication based on the address you enter (and that Sanford Health Plan has on file) and network pharmacy options.

If a medication that you are using has been removed from your formulary, you will receive a letter in the mail notifying you of the removed medication as well as the covered alternatives.
